## MARVEL IN MARBLE

**Above** Designed by Enzo Berti, Kreoo's Ducale collection comes in four coverings that were inspired by the decorative motifs often seen in Venetian palaces. The marble surface is mixed with materials such as Murano glass, brass and semi-precious stones ([www.kreoo.com](http://www.kreoo.com)).

**Opposite Page Top** Calacutta Silver porcelain tiles by Ape Grupo also come in a gold version, and they include varying formats up to 120x160 millimetres in size. Available from Guadalmansa in Cancelada (Km. 164) and Elite in Pol. Ind. Estepona ([www.guadalmansa.es](http://www.guadalmansa.es)).

**Opposite Page Bottom** Agate is a precious translucent stone of the chalcedony variety that is made up almost entirely of silicon dioxide. It is usually black, white or grey but can also be quite colourful. Highly durable, with every piece exquisitely unique, this precious stone is ideal for a bathroom. Available from Mercado da Pedra in Avda. de Salamanca in San Pedro de Alcántara ([www.mercadodapedra.com](http://www.mercadodapedra.com)).
